## Aquanatass: Water in outstanding design

June 16th, 2010

It's like a dream but reality, having a shower with the Aquanatass.

The outstanding wellness pleasure for body, spirit and soul brings the charm of having a shower «together» in the most exclusive baths and wellness-oases of this world.

Taking a shower with the Aquanatass is really a stunning experience. Not only a shower, Aquanatass is a sculpture which gets in contact with you, a slightly curved body.

**Barbara Burkhardt**

The unusual and patented technology lets the water fall gently down to your skin like a summer rain. It's an absolute new feeling, an emotional ritual.

'When I had a shower under this unique sculpture in the morning I can start the day full of energy and with a lot of new ideas', so Barbara Burkhardt who is the initiator of the Aquanatass.

**Hubert Rieber**

The Aquanatass is a really perfectly shaped work of art which has been realized by Hubert Rieber, an internationally reputable artist. The exclusive rights of distribution for this sculpture in Switzerland are with Bagno Sasso which makes as well the sales in the United Arab Emirates.

In co-operation with Hubert Rieber further shapes will be realized. All sculptures are hand-made and manufactured in limited edition. They are available in high-class materials like bronze, aluminium and wood.

This work of art is not only suitable for private bathrooms. The Aquanatass gives as well a special appeal to hotels, yachts and Spas which attach a special value to highest comfort.

'Aquanatass is an exciting product and the slender and sculptured design completes our collection in an ideal way', so Rolf Senti, CEO of Bagno Sasso.
